

# The Town of Knightdale is accepting applications for **STORMWATER INSPECTOR**

The Town of Knightdale is seeking a knowledgeable and motivated Stormwater Inspector to serve as our primary Erosion & Sedimentation Control compliance professional. This role plays a critical part in protecting local water quality while ensuring responsible development throughout our growing community. Our Stormwater Inspector will apply technical expertise to ensure development projects meet North Carolina Erosion and Sedimentation Control regulations and MS4 requirements. This position works closely with a variety of stakeholders to set clear expectations, maintain compliance, and protect the Town's waterways from day one. If you're looking for meaningful, mission-driven work with a strong work-life balance, long-term career stability, and to join a growing community that values environmental stewardship and public service, we encourage you to apply today to do your best work—for the public good.

## THE HIRING RANGE

**\$65,400 - \$72,242**

(depending on qualifications)

## THE BENEFITS

- Paid Holidays
- Vacation & Sick Leave
- 401k 5% Town Contribution
- State Retirement System
- Town-Paid Health, Dental & Vision Insurance
- Competitive Local Government Benefits
- AND MORE!!

## THE DEPARTMENT

The Public Works Department is a supportive and collaborative team that operates and maintains existing public infrastructure, plans and constructs capital improvements, protects public health and safety and natural resources, and promotes community values.

## THE POSITION

The responsibilities include assessing erosion and sedimentation control plans, granting Land Disturbance Permits, conducting field inspections on ongoing construction sites, analyzing and applying NC regulations along with MS4 requirements, and maintaining organized compliance documentation.

## THE CANDIDATE

The individual demonstrates the ability to read and interpret construction plans with confidence, communicates clearly and professionally, navigates challenging conversations with fairness and consistency, manages multiple ongoing projects effectively, and maintains a strong dedication to safeguarding local water quality.
