RE: ParkStone - Trip Generation Comparison

Kimley-Horn has performed a trip generation analysis for the ParkStone development comparing the trip generation potential of the currently proposed land uses to the trip generation from the *ParkStone TIA* dated August 19, 2016. The land uses analyzed in the TIA included:

- 350 apartments
- 130-room hotel
- 12-screen movie theater
- 212,500 square feet (SF) of general retail space
- 8,000 SF automobile parts sales store
- 2,500 SF fast-food restaurant
- Gas station with 12 fueling positions

The site is now proposed to include:

- 660 apartments (in two complexes of 350 and 310 units)
- 148 townhomes
- 124-room hotel
- 6,600 SF of office space
- 11,500 square feet of retail space
- 8,000 SF automobile parts sales store
- Gas station with 12 fueling positions.

Site trips in the 2016 TIA were generated using ITE Trip Generation 9th Edition rates and equations. The trip generation potential of the new land uses was determined using ITE Trip Generation 11th Edition rates. It should be noted that some land use categories have changed between the 9th and 11th editions. <u>Table 1</u> below summarizes the trip generation of the currently proposed land uses versus the total trip generation from the TIA. Detailed trip generation calculations for the proposed land uses and from the 2016 TIA are attached.

| Table 1 ITE Traffic Generation (Vehicles) | | | | | | | | | |
|---|---|---------------------|-------------|-------|---------|--------------|------|-----|-----|
| | 1 111 | | ily | | ak Hour | PM Peak Hour | | | |
| LUC | Land Use | Intensity - | | In | Out | In | Out | ln | Out |
| 220 | Multifamily Housing (Low-Rise) | 310 | d.u. | 1,031 | 1,031 | 29 | 90 | 97 | 57 |
| 220 | 220 Multifamily Housing (Low-Rise) 350 d.u. | | 1,160 | 1,160 | 31 | 100 | 108 | 63 | |

| | Internal Capture | 817 | 817 | 8 | 8 | 82 | 82 | | |
| | Pass-by Capture | 715 | 715 | 70 | 71 | 80 | 63 | | |
| Net New External Trips – Proposed Land Uses | | | | 3,661 | 3,661 | 171 | 304 | 302 | 225 |
| | Net New External Trips - | 6,356 | 6,356 | 264 | 285 | 475 | 464 | | |
| | Difference (Proposed | -2,695 | -3,358 | -93 | +19 | -173 | -239 | | |

As shown in Table 1, the proposed land uses are anticipated to generate 5,390 fewer daily trips, 74 fewer total AM peak hour trips, and 412 fewer total PM peak hour trips. While there is a slight increase in outbound AM peak hour traffic, the PM peak hour was the worst case in the TIA, and is more than offset by the substantial reductions in the inbound traffic and in the daily and PM peak hour traffic. It is not expected to have a significant impact to traffic operations on the surrounding roadway network, and, therefore, no additional improvements should be required based on this analysis.

Please contact me at (919) 653-2948 or travis.fluitt@kimley-horn.com should you have questions or comments regarding this analysis.

Sincerely,

Travis Fluitt, P.E. Senior Project Engineer
